

Listing of Claims:

1.-5. (Canceled)

Method Claims:

6. (Original) A method of freshening an individual, comprising : a) providing the individual with a container having a plurality of breath fresheners contained therein and a mirror; b) having the individual place at least one of said breath fresheners in the individual's mouth for breath freshening purposes; and c) having the individual view himself or herself in said mirror for visage freshening purposes.

7. (Original) The method of claim 6, wherein said visage freshening purposes includes determining whether the individual's face needs freshening.

8. (Original) The method of claim 6, wherein said visage freshening purposes includes freshening the individual's face with cosmetic products or devices.

9.-14. (Canceled)

15. (Original) A method for enhancing personal make-up or make-over treatments, comprising: a) providing a container having a plurality of mints therein and a mirror, said mirror being configured to enable an individual to perform personal make-up or make-over treatment; b) suggesting that an individual to eat the mints within the container; and c) suggesting that an individual perform personal make-up or make-over treatment using the mirror in the container.

16. (Original) The method of claim 15, further including suggesting that an individual eat mints within the container while concurrently performing personal make-up or make-over treatment using the mirror in the container.

17.-26. (Canceled)

Mirror-Display Component Claims:

27. (Original) An oral-product container assembly, comprising: a) a plurality of breath fresheners contained therein for breath freshening purposes; b) a mirror for visage freshening purposes; c) a lid for covering said mirror in a closed state and for exposing said mirror in an open state; d) a mirror-display component to enhance consumer recognition of a mirror inside of the container during a closed state of the container.

28. (Original) The container assembly of claim 27, wherein said mirror-display component includes a through-hole or transparent window through which a consumer can visually observe at least a portion of the mirror.

29. (Original) The container assembly of claim 27, wherein said mirror-display component includes a generally reflective element located on an exterior surface of the container.

30. (Original) The container assembly of claim 29, further including indicia upon said container suggesting that the presence of a mirror inside the container, said indicia being proximate said generally reflective element.

31. (Original) The container assembly of claim 27, wherein said mirror-display component includes a sample support upon which a sample container is displayed in an open state with a similar mirror exposed.

32. (Original) The container assembly of claim 27, wherein said assembly includes a rack for holding a plurality of containers, and said sample container is mounted via said sample support upon said rack.

33. (Original) The container assembly of claim 32, wherein said sample support is pivotally mounted upon said rack so as to be pivoted downward during shipping.

Specially Sized/Dimensioned Mirrored Mint Container Claims:

34. (Original) An oral-product container assembly, comprising: a) a plurality of breath fresheners contained therein for breath freshening purposes; b) a mirror for visage freshening purposes; c) a lid for covering said mirror in a closed state and for exposing said mirror in an open state; d) wherein said container has a proportional size to dimensions including a height of between about $\frac{3}{8}$ to $\frac{5}{8}$ inches, a width of between about 1 and $\frac{1}{8}$ inches to 1 and $\frac{1}{2}$ inches, and a length of between about 3 inches to 3 and $\frac{1}{4}$ inches.

35. (Original) The oral product container assembly of claim 34, wherein said mirror has proportional size to dimensions including a width of about 2 and $\frac{1}{8}$ inches to 2 and $\frac{3}{8}$ inches and a height of about $\frac{7}{8}$ inches to 1 and $\frac{1}{8}$ inches.

36. (Original) An oral-product container assembly, comprising: a) a plurality of breath fresheners contained therein for breath freshening purposes; b) a mirror for visage freshening purposes; c) a lid for covering said mirror in a closed state and for exposing said mirror in an open state; d) wherein a height of said container is less than $\frac{1}{2}$ as long as a width of said container, and wherein said width of said container is less than $\frac{1}{2}$ as long as a length of said container.

37. (Canceled)
